Capsicums

Newly Weds Foods is a leader in capsicum production, offering the highest quality and most consistent products in the industry.

Decades of experience throughout the entire process provide us with the ability to deliver capsicum products that meet or exceed expectations for flavor, heat, and color.

We contract only domestic chilies from the Mesilla and Pecos Valley regions of New Mexico as well as parts of eastern Arizona. These areas carry a global reputation for their capsicum-friendly climate, positively impacting the quality of the raw material available.
